

Joystick Plate Replacement

Getting Started

TOOLS:

- 10mm socket
- 10mm wrench
- 13mm socket

PARTS:

- New Joystick Plate

TIME FOR REPAIR:

- 10 mins

Steps 1 - 3

Remove 4 plastic caps around joystick plate

Use a 10mm socket to remove the four bolts and nuts
*Note - you will need to reach underneath the tractor to hold locking nut in place with a 10mm wrench

Steps 4 & 5

Pull the joystick and plate upwards.

Use a 13mm socket to remove the two joystick bolts.

Step 8

Switch out the old joystick plate with the new part and replace all bolts.
